Computers are useful machines. They can help people a lot in their everyday life. Our country asks everyone to learn to use computers before the twenty first century, except the old people.

Today more and more families own computers. Parents buy computers for their children. They hope computers can help them improve (提高) their studies in school. Yet, many of the children use computers to play games, to watch video (影视) or to sing karaoke (卡拉 OK), instead of studying. So, many teachers and parents complain (抱怨) that computers can not help children to study but make them fall behind. So computers are locked by parents in the boxes.
