12.手指		27.转身(短)	
13.乏味无聊的工作		28.攀爬架(短)	
14.责任, 职责		29.抓住抓紧(短)	
15.想出(短)		30.下来(短)	

## II.选择型阅读

Different weather makes people feel different. It influences health,intelligence(智力) and feelings.

In August, it is very hot and wet in the southern part of the United States . People there have heart trouble and other kinds of health problems during this month . In the Northeast and the Middle West, it is very hot sometimes and very cold some other time. People in these states have more heart trouble after the weather changes in February

or March.

The weather can also influence intelligence.For example , in a 1983 study by scientists showed that the IQs of a group of students were very high when a very strong wind came , but after the strong wind , their IQs were lower . The wind can help people have higher intelligence . Very hot weather , on the other hand , can make it lower . Students in many schools of the United States often do worse in exams in the hot months of the year (July and August).

Weather also has a strong influence on people's feelings. Winter may be a bad time for thin people. They usually feel cold these months. They might feel unhappy during cold weather. But fat people may have a hard time in hot summer.

Low air pressure(气压) may make people forgetful.People leave more bags on buses and in shops on low-pressure days . There is " good weather " for work and health. People feel best at a temperature of about 18°C. At about 18°C, people become stronger.

Are you feeling sad , tired , forgetful , or unhappy today? It may be the weather's fault.

1. \_\_\_\_\_can have a bad effect on health.

- A.Hot or wet weather B.Good weather  
C.Warm weather D.High intelligence

2..Low air pressure may make people\_\_\_\_\_.

- A.forgetful B.sad C.angry D.tired
